

Emirhan Cebiroglu

Web Developer & Designer

I am a developer who loves to learn on my own and have a strong curiosity to explore new things. Currently, I am prepared to work as a front-end developer with the technologies listed below. However, I see this as just the beginning of my journey. I am also dedicated to improving my back-end development skills, and I am actively working on it. Learning is an ongoing process for me, and I am excited to take on new challenges and grow as a well-rounded developer.

SKILLS

HTML

CSS

JAVASCRIPT

FIGMA

WEBFLOW

GITHUB

- ◆ Proficient in front-end web technologies: HTML, CSS, JavaScript.
- ◆ Experience with web design / development tools: Figma, Webflow.
- ◆ Knowledge of version control with Git and GitHub.
- ◆ Strong problem-solving and debugging skills.
- ◆ Effective communication and collaboration in cross-functional teams.
- ◆ Intermediate proficiency in English (B2 level) for clear communication with international clients and teams.

PROJECTS

Portfolio

Ariel Neville's Blog

- ◆ Designed and developed my portfolio website to showcase my passion and web design / development projects.
- ◆ Attention has been given to making the project responsive (readable and good-looking on any mobile devices).
- ◆ Used HTML, CSS, JavaScript, and Node.js to make the project ready for hosting and accessible across the world.

A personal blog website example featuring engaging articles and an interactive user interface.

This project includes API integration for the subscribe section, storing article contents on the JavaScript side, filtering articles by categories, and more.

Same technologies are used to create a mobile and user-friendly experience.

EDUCATION / RELEVANT COURSEWORK

Bachelor of Science in Software Engineering (Expected Graduation: 2025)

Sakarya University, Turkey

Web Development

Software Design

User Interface Design

Data Structures and Algorithms
